

Build trust faster for the public sector

The agentic trust platform for government vendors, federal agencies, and SLED organizations — built to strengthen security, streamline compliance, and keep mission-critical work moving.

Government vendors, federal agencies, and SLED organizations face growing pressure to meet complex, evolving security and compliance requirements, and to prove it continuously. Vanta replaces manual, fragmented processes with a unified platform that automates evidence collection, monitors controls in real time, and supports documentation-heavy standards like CMMC, FedRAMP, and NIST frameworks — including System Security Plans (SSPs) and Plans of Action & Milestones (POA&Ms).

Tailored for government and the vendors that support them

FOR GOVERNMENT VENDORS

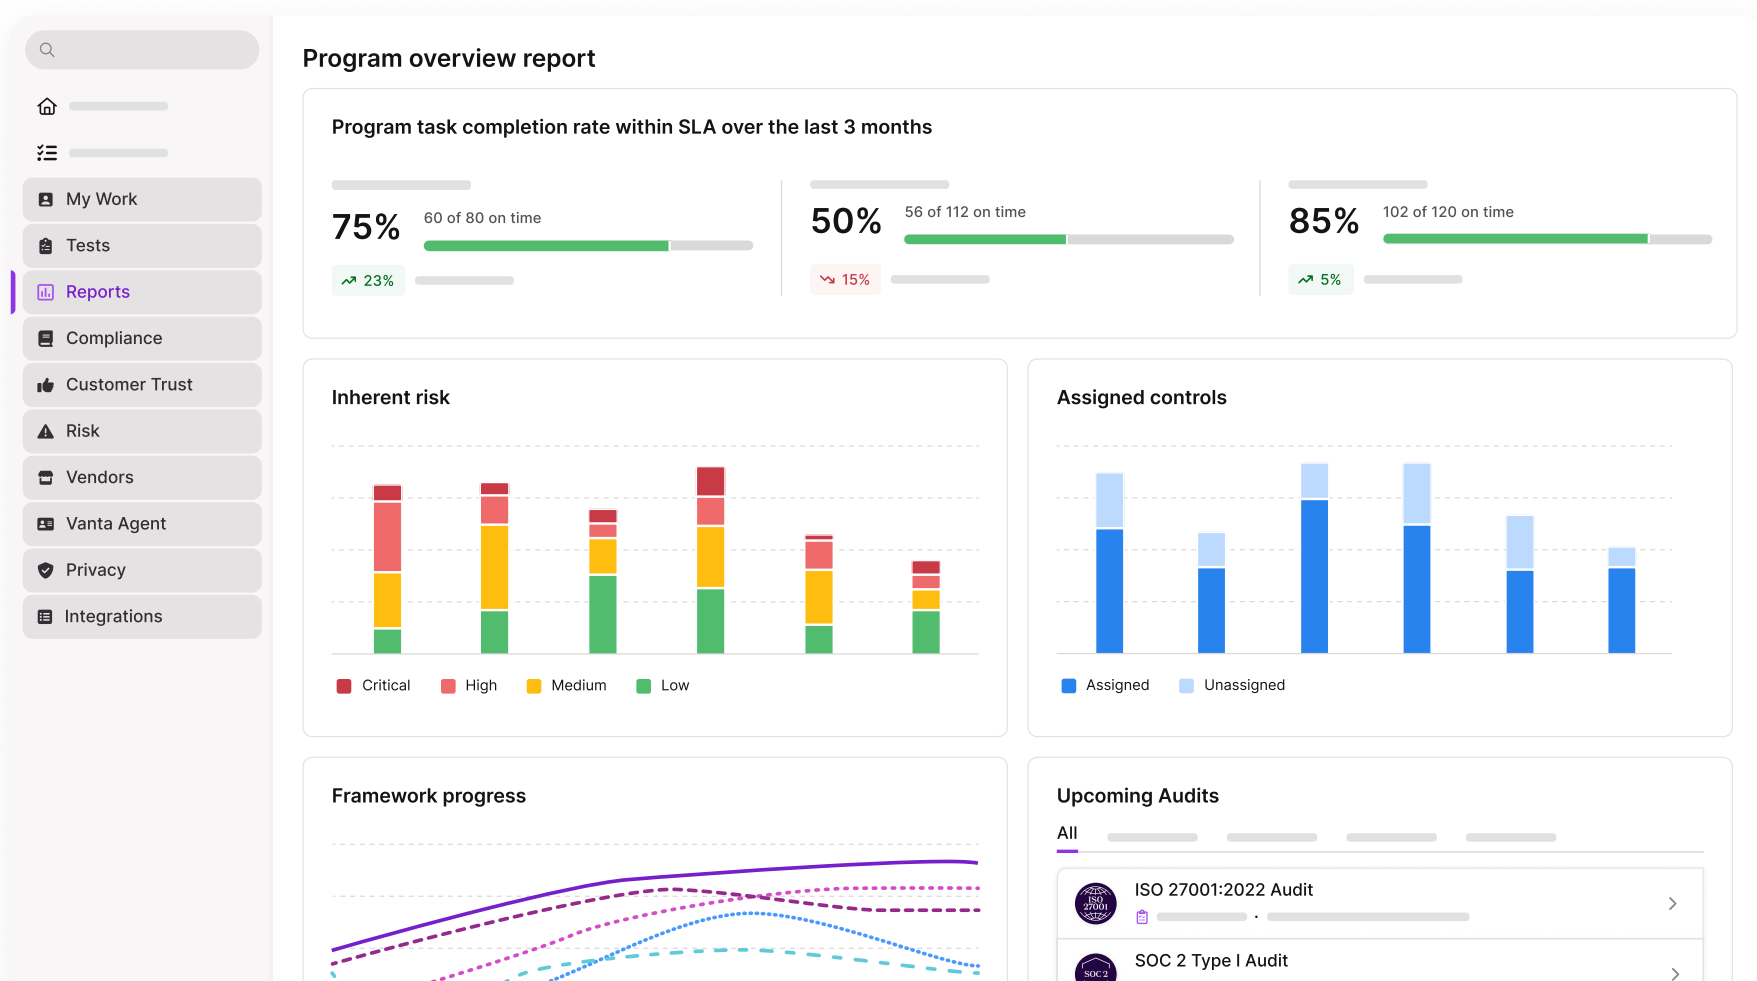

Simplify complex compliance requirements, reduce manual work, and stay ready across evolving frameworks like CMMC and FedRAMP 20x and Rev 5 without duplicating work. Demonstrate trust more clearly, move faster through reviews, and support growth in the public sector.

FOR FEDERAL AGENCIES

Strengthen oversight, improve visibility into risk management, and reduce friction in vendor evaluation and security reviews. Vanta helps agencies assess technologies faster and support secure modernization with greater confidence.

FOR STATE, LOCAL & EDUCATION (SLED) ORGANIZATIONS

Help lean teams reduce operational burden, improve readiness, and manage security and compliance work more efficiently. Vanta gives SLED organizations a clearer path to stronger oversight, faster evaluations, and secure progress without added complexity.

Why Vanta for Government

Reduce the burden of security and compliance

Cut manual work and simplify complex requirements across standards like CMMC, FedRAMP, and NIST frameworks so teams can focus less on process and more on mission-critical progress.

Stay ready with continuous visibility

Maintain a clear view of readiness, continuously monitor controls, and respond as security, risk, and compliance requirements evolve over time.

Support secure modernization

Reduce friction across vendor assessments, security reviews, and compliance workflows so modernization and technology adoption can move forward with greater confidence.

Secure your supply chain

Surface third-party risk earlier and maintain stronger oversight across the vendors and partners that support critical public sector work and mission outcomes.

Vanta Government Cloud — Vanta customers can be hosted in an AWS GovCloud environment, designed for organizations pursuing federal compliance programs or operating in heightened security environments.
