

FIVECAST

LIGHT THE DARK.

Fivecast is enabling a safer world. We help organizations like yours explore masses of data to uncover actionable insights critical to progressing your missions and protecting global communities.

Purpose-built to address critical use cases in the government and commercial sector, Fivecast deploys unique data collection and AI-enabled risk analytics to solve your most complex intelligence challenges.

WE KNOW YOU'RE DROWNING IN DATA.

**WE KNOW YOU CAN'T RISK MISSING THAT
KEY PIECE OF THE PUZZLE.**

FIVECAST.COM

HOW WE SUPPORT YOUR OBJECTIVES

FIVECAST SOLUTIONS

**FIVECAST
ONYX**

Targeted & automated data collection combined with AI-enabled risk analytics to rapidly uncover critical insights.

**FIVECAST
MATRIX**

Purpose built to perform large-scale risk assessments, digital footprinting and continuous evaluation.

**FIVECAST
LUNEX**

Rich datasets on existing, new and emerging threat groups curated by our intelligence trained Tradecraft professionals to support a range of missions.

USE CASES

Used and trusted by leading defense, national security, law enforcement, corporate security and financial intelligence organizations around the world, Fivecast is a leader in AI-enabled threat intelligence tackling a broad range of challenges, including:

COUNTER-TERRORISM

EXTREMIST THREATS

SECURITY VETTING

INSIDER THREATS

FORCE PROTECTION

TRANSNATIONAL ORGANIZED CRIME

TRAFFICKING

FOREIGN INFLUENCE

SUPPLY CHAIN RISK MANAGEMENT

FRAUD DETECTION

DUE DILIGENCE

ANTI-MONEY LAUNDERING

COUNTER TERROR FINANCING

PROTECTIVE SECURITY

FIVECAST ONYX

Effective open-source intelligence (OSINT) holds the key to overcoming intelligence challenges, force multiplying analyst teams and speeding up investigations.

Covering the end-to-end intelligence process, Fivecast ONYX fuses data from disparate sources to develop a rich, multi-source intelligence picture.

WHAT SETS US APART?

INTELLIGENCE HERITAGE

Co-developed with research institutions and national security organizations, our technology is purpose-built to address the toughest intelligence challenges.

UNMATCHED DATA ACCESS

Proprietary and unique technology enables targeted, secure and persistent collection of data in near real-time across a broad range of online platforms.

ADVANCED AI & ML

A customizable risk assessment framework driven by AI and ML uncovers threats hidden in masses of multi-media data, automating complex intelligence analysis.

COVER MORE. MISS LESS.

AI-POWERED OSINT

RISK DETECTION FRAMEWORK

Intuitive, configurable and user trainable AI models to uncover threats in multi-media data

IMAGE & LOGO DETECTION

User-definable risk detectors to zero in fast on specific data relevant to an investigation

OBJECT & CONCEPT DETECTION

Risky content in images and videos flagged for further review

SENTIMENT & EMOTION

Detect trends, patterns and indicators of potential risk hidden in masses of data
