CHIEF TECHNOLOGY & STRATEGIC OPERATIONS (CTSO) | Powered by NISE STRATEGIC INNOVATION & ENGAGEMENT PRESENTS:

Design Thinking Techniques & Agile Frameworks Bundle | 2-Day

This two-day bundle will provide students the techniques and tools needed to implement design thinking and agile frameworks within their workspace/teams.

Design Thinking provides methods to clearly define complex problems in order to develop testable innovative solutions creatively, bringing all voices into the conversation to ensure all thought process are explored. This training will enable students to frame a problem, create and prioritize innovative solutions that are feasible and have impact to the organization.

Agile Frameworks digs into theory and practice of Scrum! Students will learn to implement the Scrum framework within the military construct, which we all serve, no matter what their role (Product Owner, Scrum Master, Scrum Team). Tools / Infrastructure and Use Cases will be explored.

Principal Leadership Course; Design Thinking & Agile Frameworks Condensed | 1-Day

Designed for GS-15, O-6 and flag-level leadership. The objective of this course is to provide a tree-top view / knowledge of Design Thinking & Agile Frameworks so that leadership will understand the methodologies and tools their teams will be leveraging.
